

# Rear Axle Warranty

This warranty only applies to the original purchaser for private, **NON-COMMERCIAL** use, and to the vehicle in which the product was originally installed and / or used and is not transferrable. In the event of a warranty failure, AllUsedParts will repair, replace, or refund the purchase price, at our discretion. Warranties are limited to the retail price paid for the product and begin from original purchase date. Labor is not considered or offered on any salvage product. The warranty is limited to part replacement only.

Thank you for your purchase of a recycled rear axle from AllUsedParts. Although we are offering a “Rear Axle” certain accessories may be included with your assembly. You must always be sure and use the correct parts for your vehicle, even if it means transferring them from your old rear axle.

**ONLY** the components listed in this section (**NO LABOR**) are covered under the standard warranty for Rear Axle replacement for 6-months/6,000 miles from the date of purchase:

- Axle Shafts
- Axle Tube & Housing
- Ring & Pinion Gear

For the standard warranty to be applicable, the following must exist:

- Requires repair estimate and prior approval
- Proof of maintenance must be provided

**In order to validate your warranty, certain parts must be replaced or serviced prior to installing your replacement rear axles.** Those items include:

- Seals
- Gear lube must be changed for warranty to be validated. Add appropriate additives to limited slip units.

Your rear axle may have the following optional accessories attached for convenience, **but are not covered under the warranty.** Those items include but are not limited to,

- Leaf Springs
- Sway / stabilizer bars
- ABS Components
- Control Arms
- Shock Absorbers
- Complete Break System

**NOTE:** Gear ratios will differ and will need to be matched. This is extremely important if the vehicle is equipped with four wheel drive – if gear ratios are not matched, damage to other powertrain components may result.

**IN THE EVENT OF A FAILURE: DO NOT** uninstall the part, as this will void all warranties. We must be contacted prior to any work being performed, including removing the part, in order to maintain warranty coverage.

\*This warranty is non-transferable and therefore only applies to the vehicle in which the product was originally installed in for private, NON-COMMERCIAL use only.
